

ROSHAWA

Policy for power Saving Process of Generator **Responsible Person: Manager Maintenance.**

- ❖ We use internationally recommended & high quality L.T Panel and Bus bar.
- ❖ Power saving is ensured because of we use all cable are 100% copper and Power Saving Cable.
- ❖ All schedule maintenance done in time and we solve running fault immediately to reduce any resistance of Generator.
- ❖ All Motor's load amp & resistance are measured by experience Electrician with the help of proper tools.
- ❖ Gas saving is ensured with setting/tuning.
- ❖ We stop our Gas supply line to residence area for Extinction.
